

EPSRC UK National Quantum Technology Hub in Sensors and Metrology

Network funding

Case for Support for industrial and internal Hub visits by Hub members

The Hub has allocated £250,000 to form a national network that will promote translation and collaboration with industry. Collaboration is at the heart of what we do, with academics and leading companies working together to translate research into marketable applications. We are an international centre of excellence bringing together world-leading physicists, engineers, industry and end-users.

This fund allows for applications by PhD students, Post-Doctoral Research Assistants, and academic staff of academic institutions belonging to the Hub to visit other Hub members' laboratories or relevant industry facilities where such visits can demonstrably foster engagement and collaboration that will assist with the delivery of the UK National Quantum Technologies Programme. Typically applications for supporting site visits, networking events and industry engagement will be considered, however funding for attendance at professional conferences cannot be considered. The evaluation criteria are listed in the Annex to this document.

Funding will be made available on a reimbursement basis, with approval of applications for the use of network funds required prior to commencement of travel. Approval will enable reimbursement being claimed for economy class travel, accommodation, meals and reasonable incidentals in accordance with University of Nottingham Travel and Expenses guidelines.

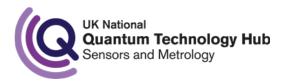

Applicants are urged to consider how funds can be most effectively used and seek to minimise allowable costs and avoid unnecessary expenses. All claims will need to be supported by original receipts, with reimbursement capped to the amounts approved prior to undertaking travel.

Please list in the table below, under the heading "Hub Sponsor", the name(s) of the researcher(s) within the Hub who support your visit.

The evaluation criteria are listed in the Annex to this document.

Please complete and return the Case for Spend to peter.milligan@nottingham.ac.uk. If you have any supporting documentation, please attach it to this form.

End Date							
1) Justification Explain who will host the visit, when the visit will take place, what the outcomes of the visit will be and how these outcomes will support and foster development of the UKNQTP. (maximum 500 words)							
t of the UKNQTP. (maximum 500 words)							
t of the UKNQTP. (maximum 500 words)							
s and how these will be managed (maximum 200 words)

Annex

Proposals will be evaluated against the following criteria;

- Alignment to the objectives of
 - o The quantum hub for sensors and metrology
 - o The broader quantum hub programme
- Excellence of the proposed concept, science and technology
- Potential impact and ability to realise the impact
